Frontend Engineer

OBJECTIVE

Obtain a position as a Software Engineer in Web applications where I can utilize existing expertise and foster new growth in software development in a positive employment environment.

EXPERIENCE

Evelyn Mainz Ballroom Dance Web Architect/Web Developer
Santa Rosa, CA — Mar 2022 - Sept 2022

Web Architect and front-end web developer for a ballroom dance business website

Accomplishments

- Deployed website: em-bd.netlify.app
- Designed and developed a web application to clients' specifications
- Leveraged React.js to develop reusable components shared across different pages
- Linked form submissions to clients' email

Technology Stack

- Figma, React, material-UI, Node.js, React-Router

EMDR Web Developer -

Los Angeles, California — June 2020 - March 2021

Full-stack developer for a Node.js Electron-based Desktop Git application, built using React and Redux.

Accomplishments

- Deployed website: veteran-emdr.netlify.app
- Designed and developed a web app that allows therapists to administer eye movement desensitization and reprocessing techniques with clients remotely
- Added features to adjust animation speed

Technology Stack

- HTML <canvas>, CSS, JavaScript

US ARMY California Army National Guard - Combat Engineer

Los Angeles, California — June 2020 - March 2021

Sergeant, Combat Engineer

Accomplishments

- Conducted meetings to communicate operational expectations and goals
- Operated a networked battle command information system that enabled truck commanders to share near-real-time friendly and enemy situational awareness information, including communication between vehicles and command posts in a combat capacity.
- Led company level training on an array of management and logistical topics
- Awarded ARCOM for demonstrated heroism, and meritorious service
